

Brainpop—Asexual Reproduction Storyboard

Name:

Period:

After watching the Brainpop on asexual reproduction, think about the examples you saw. In the boxes below, make drawings to show what happens when these different organisms reproduce asexually.

strawberries (can reproduce asexually by propagation , making runners)		
<i>at the start (single plant)</i>	<i>while happening (small plant connected)</i>	<i>when it is done (2 plants connected)</i>
yeast (reproduces asexually by budding)		
<i>at the start (parent only)</i>	<i>while happening (parent and buds)</i>	<i>when it is done (parent and floating buds)</i>
starfish (can reproduce asexually through regeneration)		
<i>at the start (missing arm)</i>	<i>while happening (regrowing arm)</i>	<i>when it is done (all 5 arms again)</i>
