

# Structure and Function in Living Things

Name:

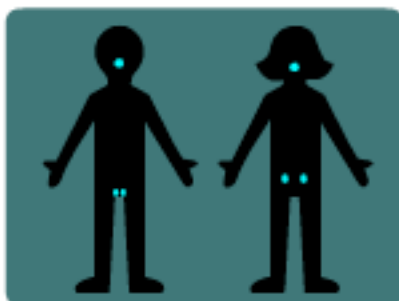

## Brainpop - Puberty

Period:

Watch the Brainpop on puberty, then complete the chart below. Put each term from the list into the correct column. You will need to decide if it applies to girls, boys, or both. You can also use Chapter 18, Section 2.

pubic hair    emotional changes    starts ages 12-13    egg released  
 awkwardness    sperm produced    breasts develop    genitals enlarge  
 larynx enlarges    menstruation    deeper voice

GIRLS	BOTH	BOYS
starts ages 10-11	pituitary gland sends out hormones	
		testes produce testosterone
	underarm hair	
hips widen		facial hair and body hair
growth spurt starts earlier and ends quickly	puberty lasts several years	
		muscles become more developed
		growth spurt starts later but lasts longer

In the cartoon, you saw the image to the left. Don't worry, (or maybe you're disappointed?) you are not filled with glowing blue stuff. What was this image describing about puberty?
