

## Structure and Function in Living Systems

Name:

### Fertilization Sequence

Period:

Cut out the steps of fertilization below, and glue them down in the correct order on the provided sheet. You can use Chapter 13, Section 2 to help you.

seed sprouts into a new plant

pollen comes off of the anther of a flower

fruit ripens, and seeds fall out

petals and stamen fall off

pollen lands on the stigma of another flower

the ovary turns into a fruit

sperm cell goes down pollen tube to an ovule

fertilized ovule turns into a seed

tube grows from pollen through style to ovary
