

Scientist Senses & Tools

Name:

Period:

The ideas for experiments come from observations. To make observations, scientists need to use their senses. They also use tools and equipment. In the boxes below and on the back of this paper, finish the sentence that has been started for you. Then draw a picture to illustrate your sentence, showing the scientist doing something science-related.

The scientist is using their sense of sight to...

The scientist is using their sense of smell to...

The scientist is using their sense of taste to...

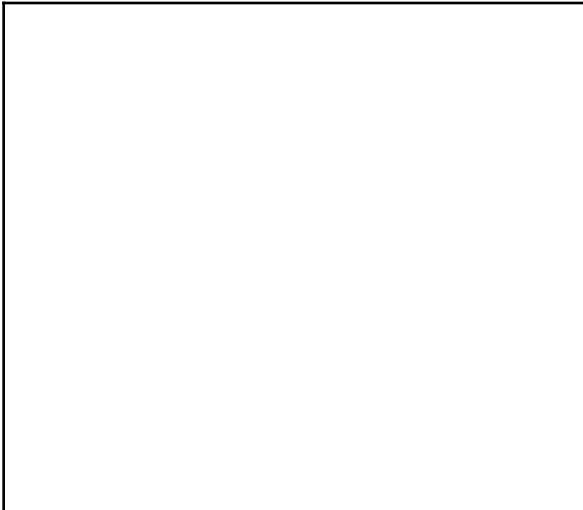

The scientist is using their sense of touch to...
