States of Matter Examples

Name:

Period:

Sort the little pieces of paper into 3 piles, one for solids, one for liquids, and one for gases. Then fill out the chart below. In the jars, draw what the particles of something in each state would look like up close.

example	state	can it change shape?	can it change volume?
atmosphere of Earth			
bones			
bubbles			
chairs			
cooking oil			
fumes from volcanoes			
helium in ballons			
honey			
ice			
lava			
mountains			
oceans
