

Scientific Method & Measurement

Name:

Undead Hypotheses

Period:

You have been asked to help write a book about surviving a zombie attack. You are to finish the hypotheses below using the correct format (see list below). Once you have written your hypotheses, draw a picture to show how you could test each one, assuming that you could find a zombie....

Remember:

- A hypothesis is a prediction that can be tested. *[ignore this one for this assignment]*
- A hypothesis answers a question that popped into your mind when you made an observation.
- A hypothesis is set up a certain way. It uses an "if...then...because" structure, to show cause and effect.
- A hypothesis contains proper spelling, grammar, and punctuation.

HYPOTHESIS #1: If you want to escape from a zombie,

then you must _____

because _____

turn over for the other hypothesis
